

OVERVIEW

SLDocGen, a document generation and management system, is an advanced, intelligent, simplified platform to make the process of drafting template based documents swift and efficient. It has been built on proprietary technology and aims to improve operations of organisations working with standard and template driven documents. By deploying an intuitive interface and process flow, Docgen can help employees increase productivity and mitigate errors.

FEATURES

1. Intuitive and simple interface

- A simple user interface built over an advanced document generation engine for assisting faster platform adoption and learning.
- Intuitive interfaces for an end user as well as the template developer

2. Q&A Wizard

- Aiding the end user with a set of simple multiple choice questions for filling in the requisite information, basis which a customized signature ready document is created within minutes

3. Template Management

- Provision to easily update and edit templates with new content
- In-built storage for saving and organizing your templates
- Active history feature to view and edit both incomplete and already generated documents

4. Bulk Document Generation

- Auto pick-up information from database and generate multiple documents with ease
- Track previous document generation requests and use the same for current requirements

VALUE PROPOSITION

- Cloud Solution: Access Any time, Any Device, Any Where
- Decreased time and Increased productivity: Enable everyone in the workplace with templates to generate documents, without having to dig through stored files or seek out other people for information
- Create customized documents at your finger-tips
- Application across industries – Government, Banking & Insurance, Legal, IT, Healthcare

SYSTEM REQUIREMENTS

- Web Browser: IE 8.0 & above, Edge and Google Chrome
- Operating System: Windows Server 2008 & above
- Web Server: MS IIS 8.0 & above
- Database: MS SQL Server 2008 & above
