SLAssets

Simplified Living

OVERVIEW

SLAssets is a full cycle material and asset management solution to keep track of the information including asset type, location, movement, maintenance request , add, issue, and salvage activities. QR Code can be created to associate any asset for easy access and periodic auditing. SLAssets solution includes a mobile application using which user can audit the assets. The assets can be tracked both online and offline. The software is designed in multitenant architecture allowing companies and their divisons to use on-premise or pay-as-you-go (SaaS) options.

FEATURES

User Registration

- Each company/division can have a separate admin.
- Company admin can register company users.
- Admin can assign appropriate access rights to users.

Asset Property

- Assets can be classified into hazardous, fragile and with expiry date.
- Assets may include voluminous assets, heavy weight assets and also its sub-assets.
- QR code is generated for assets for easy retrieval and access.

Asset Assignment and Movement

- Asset assignment to a new user/department.
- Keep track of movement of assets from one location to another.
- A user can always return back an asset.

Add, Assign, Return & Salvage

- Authorized user can add, assign, return, and salvage assets.
- Authorized users can salvage the asset which is not in use

Asset Audit and Tracking

- Periodic asset audit can be conducted using a mobile phone by scanning the QR code.
- A list of untraced assets can be generated for reconciliation.
- Multiple reports are availabler to help admin/auditor to know the details about the assests including the ones they are assigned to, location, movement report etc.

Valuation and Depreciation

- Authorized users can compute the depreciation value for each asset and can also find out the present asset value.

RENSOL
